## 1.0 General Description

Parameter	Specification	Unit	Remarks
LCD Size	12.2	inch	-
Active area	262.656(H) ×164.16(V)	mm	-
Number of pixels	1280(H) ×800 (V)		-
Pixel pitch	0.2052 (H) × 0.2052(V)	mm	-
Pixel arrangement	RGB	-	-
Display colors	16.7M	colors	-
Display mode	Normal black		-
LCM Outline Dimension	271.06±0.3(W)×176.42±0.3(V) × 2.66±0.2(D)	mm	
Transmittance	6.0%	-	W/O APF
NTSC	Тур. 50%	-	-
Inversion Type	1+2LINE	-	
Response Time	Typ. 30ms, Max. 35ms	ms	
CR	Typ. 900 Min:700		
Brightness	Typ:300 Min:270	nits	@center
Brightness Uniformity(9Point)	Typ.75%,70%Min	-	
Viewing angle (CR≧10)	Typ:80/80/80/80		
LCM Weight	290(Max.)	gram	No Digging Hole

## 2.0 ELECTRICAL SPECIFICATIONS

#### 2.1 TFT LCD Module

< Table 1 . LCD Module Electrical Specifications >

[Ta =25±2 °C]

Parameter		Min.	Тур.	Max.	Unit	Remarks
Power Supply Voltage	$V_{DD}$	3.0	3.3	3.6	V	Note 1
Power Supply Current	I <sub>DD</sub>	-	350	450	mA	Note 1
Positive-going Input Thresh old Voltage	V <sub>IT+</sub>	-	-	100	mV	V 1.2V(turp
Negative-going Input Thresh old Voltage	V <sub>IT-</sub>	-100	-	-	mV	V <sub>cm</sub> = 1.2V typ.
Differential Input Voltage	V <sub>ID</sub>	380	-	1200	mV	
	P <sub>D</sub>	-	1.0	1.4	W	white
Power Consumption	$P_{BL}$	-	2.8	3.1	W	W/I Driver
	P <sub>total</sub>	-	3.8	4.5	W	

Notes : 1. The supply voltage is measured and specified at the interface connector of LCM. The current draw and power consumption specified is for 3.3V at 25 °C Max value at White Pattern

2. Calculated value for reference (VLED X ILED)

### 3.0 ABSOLUTE MAXIMUM RATINGS

The followings are maximum values which, if exceed, may cause faulty operation or damage to the unit. The operational and non-operational maximum voltage and current values are listed in Table 2.

< Table 2. LCD Module Electrical Specifications >	[Ta =25±2 ℃]
---	--------------

Parameter	Symbol	Min.	Max.	Unit	Remarks
Power Supply Voltage	V <sub>DD</sub>	-0.3	4.2	V	Note 1
Logic Supply Voltage	V <sub>IN</sub>	V <sub>ss</sub> -0.3	V <sub>DD</sub> +0.3	V	Note 1
Operating Temperature	T <sub>OP</sub>	0	+50	°C	Nata 0
Storage Temperature	Τ <sub>st</sub>	-20	+60	°C	Note 2

Note : 1) Temperature and relative humidity range are shown in the figure below. Wet bulb temperature should be 39 °C max. and no condensation of water.

### 6.0 Optical Specifications

The test of Optical specifications shall be measured in a dark room (ambient luminance  $\leq 1$  lux and temperature =  $25\pm2^{\circ}$ C) with the equipment of Luminance meter system (CA-310, BM-5A) and test unit shall be located at an approximate distance 50cm from the LCD surface at a viewing angle of  $\theta$  and  $\Phi$  equal to 0°. We refer to  $\theta_{\emptyset=0}$  (= $\theta_3$ ) as the 3 o'clock direction (the "right"),  $\theta_{\emptyset=90}$  (=  $\theta_{12}$ ) as the 12 o'clock direction ("upward"),  $\theta_{\emptyset=180}$  (=  $\theta_9$ ) as the 9 o'clock direction ("left") and  $\theta_{\emptyset=270}$ (=  $\theta_6$ ) as the 6 o'clock direction ("bottom"). While scanning  $\theta$  and/or  $\emptyset$ , the center of the measuring spot on the Display surface shall stay fixed. The measurement shall be executed after 30 minutes warm-up period. VDD shall be 3.3V +/-10% at 25°C. Optimum viewing angle direction is 6 'clock.

SPEC. NUMBER	SPEC. TITLE B3 TV122WXM-NW0 Product Specification		PAGE 17 OF 36

#### Note :

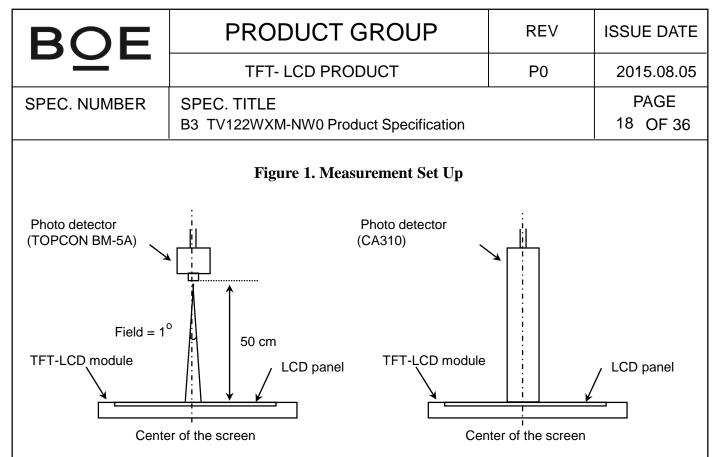

- 1. Viewing angle is the angle at which the contrast ratio is greater than 10. The viewing angles are determined for the horizontal or 3, 9 o'clock direction and the vertical or 6, 12 o'clock direction with respect to the optical axis which is normal to the LCD surface (see FIGURE 1).
- Contrast measurements shall be made at viewing angle of Θ= 0 and at the center of the LCD surface. Luminance shall be measured with all pixels in the view field set first to white, then to the dark (black) state . (see FIGURE 1) Luminance Contrast Ratio (CR) is defined mathematically.

Luminance when displaying a white raster

CR =

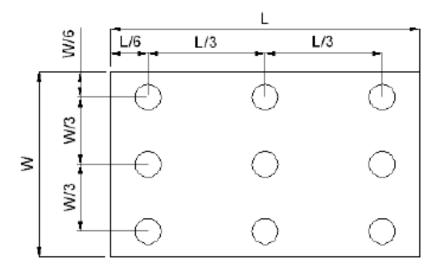

Luminance when displaying a black raster

- 3. Center Luminance of white is defined as luminance values of 1point average across the LCD surface. Luminance shall be measured with all pixels in the view field set first to white. This measurement shall be taken at the locations shown in FIGURE 2 for a total of the measurements per display. The luminance is measured by CA310 when the LED current is set at 16.8mA.
- The White luminance uniformity on LCD surface is then expressed as : ΔY = Minimum Luminance of 9points / Maximum Luminance of 9points (see FIGURE 2).
- 5. The color chromaticity coordinates specified shall be calculated from the spectral data measured with all pixels first in red, green, blue and white. Measurements shall be made at the center of the panel.
- 6.The color chromaticity coordinates specified shall be calculated from the spectral data measured with all pixels first in red, green, blue and white. Measurements shall be made at the center of the panel.
- 7. The electro-optical response time measurements shall be made as FIGURE 4 by switching the "data" input signal ON and OFF. The times needed for the luminance to change from 10% to 90% is Tr, and 90% to 10% is Td.

View angel range measurement setup Luminance, uniformity and color measurement setup

Figure 2. White Luminance and Uniformity Measurement Locations (9 points)

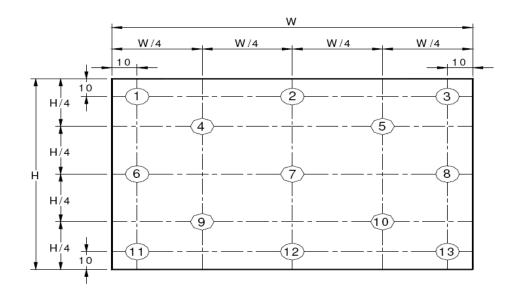

Center Luminance of white is defined as luminance values of center 5 points across the LCD surface. Luminance shall be measured with all pixels in the view field set first to white. This measurement shall be taken at the locations shown in FIGURE 2 for a total of the measurements per display.

The White luminance uniformity on LCD surface is then expressed as :  $\Delta Y9 =$  Minimum Luminance of 9points / Maximum Luminance of 9points (see FIGURE 2).

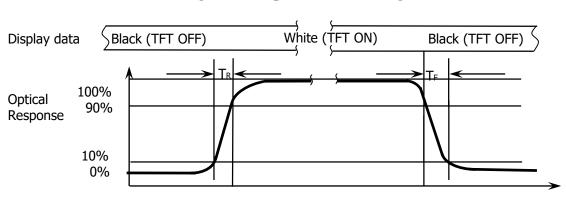

BOE	PRODUCT GROUP	REV	ISSUE DATE
	TFT- LCD PRODUCT	2015.08.05	
SPEC. NUMBER	SPEC. TITLE B3 TV122WXM-NW0 Product Specification		PAGE 19 OF 36

Figure 3. Uniformity Measurement Locations (13 points)

The White luminance uniformity on LCD surface is then expressed as :  $\Delta$ Y13 = Minimum Luminance of 13 points /Maximum Luminance of 13 points (see FIGURE 3).

The White luminance uniformity of 5 point is the same test method as 13 point u sing FIGURE 3.

The electro-optical response time measurements shall be made as shown in FIGURE 3 by switching the "data" input signal ON and OFF. The times needed for the luminance to change from 10% to 90% is Tr and 90% to 10% is Td.

#### 10.0 Handing & Cautions

- (1) Cautions when taking out the module
  - Pick the pouch only, when taking out module from a shipping package.
- (2) Cautions for handling the module
  - As the electrostatic discharges may break the LCD module, handle the LCD module with care. Peel a protection sheet off from the LCD panel surface as slowly as possible.
  - As the LCD panel and back light element are made from fragile glass material, impulse and pressure to the LCD module should be avoided.
  - As the surface of the polarizer is very soft and easily scratched, use a soft dry cloth without chemicals for cleaning.
  - Do not pull the interface connector in or out while the LCD module is operating.
  - Put the module display side down on a flat horizontal plane.
  - Handle connectors and cables with care.
- (3) Cautions for the operation
  - When the module is operating, do not lose CLK, ENAB signals. If any one of these signals is lost, the LCD panel would be damaged.
  - Obey the supply voltage sequence. If wrong sequence is applied, the module would be damaged.
- (4) Cautions for the atmosphere
  - Dew drop atmosphere should be avoided.
  - Do not store and/or operate the LCD module in a high temperature and/or humidity atmosphere. Storage in an electro-conductive polymer packing pouch and under relatively low temperature atmosphere is recommended.
- (5) Cautions for the module characteristics
  - Do not apply fixed pattern data signal to the LCD module at product aging.
  - Applying fixed pattern for a long time may cause image sticking.
- (6) Other cautions
  - Do not disassemble and/or re-assemble LCD module.
  - Do not re-adjust variable resistor or switch etc.
  - •When returning the module for repair or etc., Please pack the module not to be broken. We recommend to use the original shipping packages.
